

SOHAN GADEWAR

Associate Product Manager Candidate | B.Tech IT, VIIT Pune (CGPA: 8.97 / 10.0)

+91 9022778561 • sohangadewar9022@gmail.com • Portfolio: portfolio-sohan9022.vercel.app • [LinkedIn](#) • [GitHub](#) • Pune, India

EDUCATION

Vishwakarma Institute of Information Technology (VIIT), Pune | Bachelor of Technology in Information Technology | **2023 – 2027** | **CGPA: 8.97 / 10.0**

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, System Design • Problem Solving: 400+ LeetCode, 210+ GeeksforGeeks

SELECTED PRODUCT SYSTEMS & VALIDATED PROTOTYPES

Project Sentinel — AI Decision Memory & State-Drift Agent | Enterprise AI | Live MVP: echo-sentinel-08.lovable.app | [Notion PRD](#)

- **Discovery & Problem Framing:** Identified critical engineering context loss across daily standups, Slack threads, and Jira; observed that incumbent meeting summarizers trigger high uninstall rates by blasting unsolicited channel notifications that disrupt deep work.
- **Product Strategy & "Silent-by-Default" Thesis:** Formulated the "Silent-by-Default" product thesis—ingests audio transcripts and Git commit streams passively without interrupting channels; scoped out automated ticket creation and developer velocity surveillance in V1 to protect team psychological safety.
- **State-Drift Detection & Architecture:** Architected deterministic audit engine surfacing discrepancies between spoken commitments and recorded codebase state (the "said-vs-confirmed" gap) strictly upon explicit user query; designed append-only PostgreSQL event schema mapping detected drift to immutable transcript timestamps.
- **Execution & Shipped Validation:** Shipped interactive 8-step clickable MVP on Lovable with live state drift queries; authored comprehensive 400-line Notion PRD detailing state transition matrices, query grammar, failure recovery states, and phased enterprise GTM rollout.

FinMate AI — Conversational Expense Memory & Deterministic Accounting | FinTech Systems | Live MVP: tell-finmate-ai.lovable.app | [Notion PRD](#)

- **User Friction & Market Insight:** Addressed the steep user abandonment rate in personal finance tracking caused by tedious 6-field manual entry forms, while uncovering that pure conversational LLM finance bots routinely hallucinate arithmetic totals, rendering them untrustworthy for real financial accounting.
- **Decoupled System Architecture:** Established two-stage decoupled architecture: constrained multimodal LLMs (voice notes, receipt snapshots via OCR, natural language chat) strictly to intent and entity parsing (JSON), while routing 100% of arithmetic calculations and balance aggregations to concurrency-safe PostgreSQL stored procedures (RPCs).
- **Auditability & Zero-Hallucination Evidence:** Enforced complete financial transparency through evidence-linked ledger rows—guaranteeing that every AI response provides clickable citations directly to underlying transaction records, eliminating calculation discrepancies entirely.
- **Execution & Shipped Validation:** Shipped production-ready Lovable MVP featuring streaming voice transcription, receipt parsing, and informal loan tracking; authored complete Notion PRD covering database schemas, RLS security policies, and error handling states.

PATENTS & USER RESEARCH

- **Patent Application Draft (VIT Pune UX Lab):** AI-Driven Multilingual Adaptive UI Framework & Zero-Risk Financial Sandbox — Designed dual-mode environment pairing live transactions with a simulated practice sandbox (dummy balances), in-situ Hold-to-Translate, and Circle-to-Understand gesture affordances to eliminate digital financial hesitation in emerging vernacular markets | 2026
- **Patent Filed (South African Patent Office):** AI-Powered Lost & Found Matching System — Conceptualized a 5-factor blind multimodal scoring architecture (image embeddings, NLP text, geolocation, timestamp) with automated urgency detection | 2025

HONORS & COMPETITIONS

- **India Innovates Hackathon — National Finalist:** Selected among top finalist teams nationwide out of 6,000+ participating teams
- **GHCI 25 Hackathon — Round 2 Qualifier:** AnitaB.org India & Backbase | National GenAI Hackathon: 'Unbound with GenAI: Breaking Barriers, Creating Impact'

PRODUCT MANAGEMENT & TECHNICAL SKILLS

- **Product Management:** Product Discovery, PRD Writing, Jobs-to-be-Done (JTBD), User Journey Mapping, RICE Prioritization, North Star & Guardrail Metrics, Customer Interviews, Experimentation, GTM Strategy, Trade-off Analysis
- **AI & Systems:** LLM Prompt Engineering, RAG Architectures, Multimodal Ingestion, Deterministic SQL, AI Governance, Lovable.dev (Rapid MVPs), Supabase (RLS), Vector Embeddings
- **Engineering & Problem Solving:** Java, Spring Framework, Python, SQL/PostgreSQL, REST APIs, Git, System Architecture • Competitive Programming: 400+ LeetCode, 210+ GeeksforGeeks
