SOHAN GADEWAR

+91 9022778561 • sohangadewar9022@gmail.com • Portfolio • LinkedIn • GitHub

PROFILE SUMMARY

Technical product builder combining strong software engineering foundations with user-centric 0-to-1 execution. Proven track record of conducting user research, framing product theses, and scoping comprehensive PRDs for AI-driven systems. Skilled at balancing technical feasibility with intuitive design to build deterministic architectures that eliminate workflow friction and earn user trust.

EDUCATION

Vishwakarma Institute of Information Technology (VIIT), Pune **2023 – 2027**

Bachelor of Technology in Information Technology | **CGPA: 8.97 / 10.0 (Pursuing)**

Relevant Coursework: Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems, Computer Networks, System Design, Object-Oriented Programming (OOP)

WORK EXPERIENCE & PROJECTS

Project Sentinel — AI Decision Memory & State-Drift Agent | Enterprise AI Product

Interactive Prototype: echo-sentinel-08.lovable.app **|** **PRD Specification:** Notion PRD

- Spearheaded product discovery across engineering standups, Slack, and Jira, identifying critical context loss and finding that unprompted bot summaries cause heavy distraction by interrupting developer focus.
- Formulated the **"Silent-by-Default"** product thesis, passively ingesting audio transcripts and commit streams without channel spam while deliberately scoping out employee surveillance features in V1.
- Architected deterministic audit engine powered by **append-only PostgreSQL schemas**, surfacing discrepancies between spoken commitments and recorded codebase state strictly upon explicit user queries.
- Shipped interactive clickable MVP on Lovable with live drift queries; authored comprehensive **Notion PRD** detailing state transition matrices, query grammar, and phased enterprise rollout.

FinMate AI — Conversational Expense Memory & Deterministic Accounting | FinTech Systems

Live Production MVP: tell-finmate-ai.lovable.app **|** **Architecture & PRD:** Notion PRD

- Uncovered key user friction in expense tracking where tedious manual multi-field forms trigger severe drop-off, while identifying that pure LLM bots hallucinate arithmetic totals, destroying financial trust.
- Engineered **two-stage decoupled architecture** directing multimodal LLMs (voice notes, OCR receipts, chat) to extract structured JSON intents and entities, while routing all arithmetic calculations to concurrency-safe PostgreSQL stored procedures (RPCs).
- Enforced complete financial auditability through **evidence-linked ledger rows**, guaranteeing clickable citations for every balance response and preventing arithmetic discrepancies.
- Deployed production-ready MVP on Lovable with **streaming voice transcription** and informal loan tracking; authored complete PRD covering database schemas, Row-Level Security (RLS) policies, and error handling.

PATENTS & RESEARCH

- **Filed Patent (South African Patent Office):** AI-Powered Lost & Found Matching System — Conceptualized 5-factor blind multimodal scoring architecture (image embeddings, NLP text, geolocation, timestamp) with automated urgency detection | 2025
- **HCI Research Study (Submitted to JASE for Peer Review):** AI-Driven Multilingual Adaptive UX Framework & Zero-Risk Financial Sandbox — Designed dual-mode environment pairing live transactions with a simulated practice sandbox (dummy balances), in-situ Hold-to-Translate, and Circle-to-Understand gesture affordances | 2025

HONORS & AWARDS

- **National Finalist at India Innovates Hackathon:** Ranked among **top 20% finalist teams** nationwide out of **6,000+ participating teams** across India | 2026
- **Qualified for Round 2 in GHCI 25 National GenAI Hackathon:** AnitaB.org India & Backbase | 'Unbound with GenAI: Breaking Barriers, Creating Impact' | **Certificate** | 2025

SKILLS

- **Product Management:** Product Discovery, Product Requirements Document (PRD), Jobs-to-be-Done (JTBD), User Journey Mapping, RICE Prioritization, North Star & Guardrail Metrics, Customer Interviews, Experimentation, Go-to-Market (GTM) Strategy, Trade-off Analysis, Figma
- **AI & Systems:** LLM Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Governance, Vector Embeddings, Multimodal AI (Voice, Vision OCR), PostgreSQL Stored Procedures (RPC), REST APIs, High-Level Design (HLD)
- **Technical & Problem-Solving:** Java, Spring Framework, Python, SQL/PostgreSQL, REST APIs, Git, LangChain, LangGraph, Rapid Prototyping (Lovable.dev)
- **DSA & Competitive Programming:** 610+ Solved Problems — 400+ LeetCode, 210+ GeeksforGeeks (Data Structures, Algorithms, Problem Solving)

CERTIFICATIONS

Product Management Masterclass (GeeksforGeeks) | n8n Workflow Automation (CampusX) | Advanced RAG (CampusX) | Prompt Engineering | Docker for ML (CampusX)
