

SOHAN GADEWAR

Associate Product Manager | Product Builder | B.Tech IT, VIIT Pune (CGPA: 8.97 / 10.0)

Pune, India | +91 9022778561 | sohangadewar9022@gmail.com | portfolio-sohan9022.vercel.app | linkedin.com/in/sohangadewar | github.com/Sohan9022

PROFILE SUMMARY

Associate Product Manager candidate and 0-to-1 product builder combining strong software foundations (CGPA: 8.97/10.0) with rapid execution. Experienced in scoping comprehensive PRDs, conducting user research, and deploying AI-driven systems with deterministic architectures that eliminate cognitive fatigue.

EDUCATION

Vishwakarma Institute of Information Technology (VIIT), Pune | Bachelor of Technology in Information Technology | **2023 – 2027 (Expected)** | **CGPA: 8.97 / 10.0**

Relevant Coursework: Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems, Computer Networks, System Design, Object-Oriented Programming (OOP)

WORK EXPERIENCE & PROJECTS

Project Sentinel — AI Decision Memory & State-Drift Agent | Enterprise AI Product | **2024 – 2025**

Interactive Prototype: echo-sentinel-08.lovable.app | PRD Specification: [Notion PRD](#)

- Spearheaded product discovery across standups, Slack, and Jira, identifying critical context loss and finding that unprompted bot summaries cause an 80%+ uninstall rate by interrupting deep developer focus.
- Formulated the "Silent-by-Default" product thesis, passively ingesting audio transcripts and commit streams without channel spam while deliberately scoping out employee surveillance features in V1.
- Architected deterministic audit engine powered by append-only PostgreSQL schemas, surfacing discrepancies between spoken commitments and recorded codebase state strictly upon explicit user queries.
- Shipped interactive 8-step clickable MVP on Lovable with live drift queries; authored comprehensive 400-line Notion PRD detailing state transition matrices, query grammar, and phased enterprise rollout.

FinMate AI — Conversational Expense Memory & Deterministic Accounting | FinTech Systems | **2024 – 2025**

Live Production MVP: tell-finmate-ai.lovable.app | Architecture & PRD: [Notion PRD](#)

- Uncovered key user friction in expense tracking where tedious 6-field forms trigger 70% onboarding drop-off, while identifying that pure LLM bots hallucinate arithmetic totals, destroying financial trust.
- Engineered two-stage decoupled architecture directing multimodal LLMs (voice notes, OCR receipts, chat) to extract structured JSON intents and entities, while routing 100% of arithmetic calculations to concurrency-safe PostgreSQL stored procedures (RPCs).
- Enforced complete financial auditability through evidence-linked ledger rows, guaranteeing clickable citations for every response and eliminating arithmetic discrepancies.
- Deployed production-ready MVP on Lovable with streaming voice transcription and informal loan tracking; authored complete PRD covering database schemas, Row-Level Security (RLS) policies, and error handling.

PATENTS & RESEARCH

- **Filed Patent (South African Patent Office):** AI-Powered Lost & Found Matching System — Conceptualized 5-factor blind multimodal scoring architecture (image embeddings, NLP text, geolocation, timestamp) with automated urgency detection | 2025
- **Published HCI Research Study:** AI-Driven Multilingual Adaptive UX Framework & Zero-Risk Financial Sandbox — Designed dual-mode environment pairing live transactions with a simulated practice sandbox (dummy balances), in-situ Hold-to-Translate, and Circle-to-Understand gesture affordances | 2025

HONORS & AWARDS

- **Won National Finalist at India Innovates Hackathon:** Ranked among top finalist teams nationwide out of 6,000+ participating teams across India | 2024
- **Qualified for Round 2 in GHCI 25 National GenAI Hackathon:** AnitaB.org India & Backbase | 'Unbound with GenAI: Breaking Barriers, Creating Impact' | 2025

SKILLS

- **Product Management:** Product Discovery, Product Requirements Document (PRD), Jobs-to-be-Done (JTBD), User Journey Mapping, RICE Prioritization, North Star & Guardrail Metrics, Customer Interviews, Experimentation, Go-to-Market (GTM) Strategy, Trade-off Analysis, Figma
- **AI & Systems:** LLM Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Governance, Vector Embeddings, Multimodal AI (Voice, Vision OCR), PostgreSQL Stored Procedures (RPC), REST APIs, High-Level Design (HLD)
- **Technical & Problem-Solving:** Java, Spring Framework, Python, SQL/PostgreSQL, REST APIs, Git, LangChain, LangGraph, Rapid Prototyping (Lovable.dev)
- **DSA & Competitive Programming:** 610+ Solved Problems — 400+ LeetCode, 210+ GeeksforGeeks (Data Structures, Algorithms, Problem Solving)

CERTIFICATIONS

Product Management Masterclass (GeeksforGeeks) | AI Agents & Automation (CampusX) | Advanced RAG Architecture (CampusX) | Prompt Engineering & Docker for ML (CampusX)
